ABOUT ME

Summarize this CV with AI:

My name is Oleksandr Harazha, I am 22 years old. I love writing vanilla PHP, and I like building with Laravel. As a vanilla PHP developer, see my “Vanilla Core”: an MVC framework I built from scratch to see how a backend works from the inside. As a Laravel developer, see my “Thirteen Flies”: a fully-fledged e-commerce API with a Filament admin panel and Stripe Checkout. Before development I spent 2 years in SEO, so I build with search engines in mind.

Skills

I work with

- PHP: OOP, procedural
- Laravel: REST API, Blade, Filament admin panel
- MySQL, MariaDB, SQLite: database design
- MVC, DI container, middleware, PDO
- Stripe Checkout and webhooks
- Git, Postman
- HTML, CSS, basic JavaScript (ES6)
- Technical and on-page SEO
- WordPress (basic), Claude Code

Studying now

- SOLID principles
- Docker
- Tailwind CSS
- Advanced JavaScript (ES6)
- React, goal for 2027: the RILT stack (React, Inertia, Laravel, Tailwind)

Experience

Trainee PHP Backend Developer

Trendo · Every morning · Oct 2026 – Present

Helping development team with e-commerce project on Laravel: infrost.com.ua.
