About Me

Recently (21.08.2024), I finished an SEO beginner's course from the Projector Creative & Tech Online Institute with a golden certificate, where, in the role of team lead, I, along with my team, created an SEO audit and compiled the semantic core for a refrigeration systems website. Now (since 28.08.2024), on a part-time basis, I'm working in-house on a project with a .edu domain and searching for my first full-stack company.
